Abstracts

Silicone glue is a part of organic silicon products, which is an adhesive composed of sodium silicate, acetic acid and organic silicone. China's silicone adhesive began to be widely used in the 1980s. Due to technical limitations in the early stage, the silicone adhesive was highly dependent on imports. In recent years, thanks to the rapid development of China's construction, electronics, energy and other industries, the demand for silicone sealant in the domestic market has grown rapidly, driving the gradual expansion of China's silicone sealant capacity. At present, China has become the world's largest producer of silicone sealant, and silicone sealant has also been replaced by domestic products.
