Abstracts

The global Silver-based Antimicrobial Agent market size is expected to reach \$ 354 million by 2032, rising at a market growth of 3.8% CAGR during the forecast period (2026-2032).

Antimicrobial action of silver comes from the chemical properties of its ionized form “Ag⁺”. Silver interrupts the bacteria cell’s ability to form the chemical bonds essential to its survival. These bonds produce the cell’s physical structure so when bacteria meets silver it literally falls apart. For this reason, silver-based antimicrobial agent is especially in demand in many applications.

Silver-based antimicrobial agent has two forms: dispersion liquid and powder. Dispersion liquid antimicrobial agent mainly used in textile industry. In this report, both dispersion liquid and powder are counted.

China is the largest producer of Silver-based Antimicrobial Agent, with a market share about 35%, followed by North America and Europe, etc. BASF, Thomson Research Associates, Toagosei, Sinanen Zeomic and Addmaster are the top 5 manufacturers of industry, and they had about 50% combined market share.

This report studies the global Silver-based Antimicrobial Agent production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Silver-based Antimicrobial Agent and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year.
