According to our (Global Info Research) latest study, the global Silver-Loaded Zirconium Phosphate market size was valued at USD million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of % during review period.

Silver-loaded zirconium phosphate is a laminated zirconium phosphate carrier which has the advantages of high safety and heat resistance, good chemical stability and can be added to all types of resins to act as an antibacterial agent. It can provide efficient broad-spectrum sterilisation and removal of all types of bacteria. Due to the smaller particle size and better heat resistance of this inorganic antibacterial powder, it is particularly suitable for use in melt spinning of synthetic fibres (e.g. polyester, polypropylene, nylon, etc.) and in ceramic products where higher heat resistance is required.
