Abstracts

The global Silver-Plated Reflective Film market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

The surface conductivity of the metal coating of the silver-plated reflective film is high, the penetration depth is shallow, and the reflectivity is the best, but it is expensive. The reflective film is generally placed at the bottom of the backlight module. Its main purpose is to reflect the light leaked through the light guide plate and return to the panel side, so as to reduce light loss and increase brightness.
