Silver zinc oxide contact material is an electrical contact material with silver as the matrix and zinc oxide (ZnO) as the reinforcement phase. The chemical formula is usually expressed as AgZnO. This material has good thermal stability, resistance to welding, low and stable contact resistance, electrical corrosion resistance, and environmental protection and non-toxicity. Its core function is to achieve reliable circuit switching in low-voltage electrical appliances, and to improve equipment life and safety by inhibiting arc ablation and reducing contact resistance. Compared with traditional silver cadmium oxide, silver zinc oxide has become an environmentally friendly alternative material because it does not contain toxic cadmium elements.
