The global Similar Biological Medicinal Products market size is expected to reach \$ 70680 million by 2029, rising at a market growth of 17.2% CAGR during the forecast period (2023-2029).

Similar biopharmaceutical products refer to a biological product that is highly similar in quality, safety and efficacy to the original drug biological preparation that has been approved for marketing. This type of drug is not a universal generic drug because the complexity of the original biological drugs (such as proteins, antibodies, etc.) they replicate and the specificity of the production process make identical replication almost impossible.
