The Easy Lens Holder is a simple device for holding and supporting lenses. It is usually made of a lightweight material, such as plastic or metal, for ease of use and portability. The Easy Lens Holder is designed to ensure stability and accurate alignment of the lens. It usually has the following features: Clamping function: The mount usually has a clamping mechanism that can clamp the lens and fix it in the desired position. The clamping mechanism can be spring clamping, screw clamping or other suitable clamping methods. Adjustability: Fixtures are usually adjustable for fine-tuning the position and angle of the lens. This helps ensure accurate alignment and focus of the lenses. Stability: The simple lens holder should have stable support and fixing functions to prevent unnecessary vibration or movement of the lens during use. Portability: Due to its simple design, this mount is usually light and portable, making it easy to carry and use on different occasions. The simple lens holder is suitable for some simple optical experiments, observations or scenes of daily use. For example, in educational labs it can be used to hold lenses to demonstrate optical principles. For personal use or DIY projects, it can be used to assemble simple optics or magnifying glasses.
