A simple radio is a radio terminal used at a simple radio station for business or personal leisure use. The radio station does not require a radio operator license, so anyone can use it. Depending on the form of the radio, it is divided into fixed, vehicle-mounted, and portable types, with the portable type generally referred to as a transceiver.

Unlike cellular phones, simple radios can share a channel in advance and transmit to multiple people at once. No phone numbers need to be entered, and transmissions can be made as soon as the "send" button is pressed. It can also be used deep in the mountains where there is no cell phone coverage. Thus, simple radios are excellent for those who want to keep in close contact with predetermined members of the group.
