Abstracts

The global Single-Component Peroxyacetic Acid Disinfectant for Endoscopes market size is expected to reach \$ 372 million by 2032, rising at a market growth of 5.2% CAGR during the forecast period (2026-2032).

Single-component peracetic acid disinfectant for endoscopes is a high-level disinfectant centered on a stabilized, single-component peracetic acid system. Typically, it does not require the mixing of a primary agent and an activator prior to use; it can be applied directly or after dilution as required for the disinfection of flexible endoscopes, rigid endoscopes, and associated accessories. Its key characteristics include a broad spectrum of antimicrobial activity, rapid action, relatively low residual decomposition, suitability for disinfecting endoscope lumens, and compatibility with automated endoscope washer-disinfectors. In 2025, global sales volume is projected to reach approximately 7.8 million liters, with an average unit price of approximately \$32 per liter and a capacity utilization rate of approximately 72%. Upstream enterprises primarily consist of suppliers of hydrogen peroxide, glacial acetic acid, stabilizers, corrosion inhibitors, surfactants, purified water, packaging containers, concentration test strips, and hazardous chemical logistics services. Downstream entities mainly comprise hospital digestive endoscopy centers, respiratory endoscopy centers, ENT departments, urological endoscopy centers, clinics, health examination centers, third-party sterile processing organizations, and medical device reprocessing service providers. The gross profit margin stands at approximately 41%. Within the product's cost structure, the active peracetic acid ingredient and precursor raw materials account for 28%; stabilizers and corrosion inhibitors for 15%; surfactants and functional additives for 7%; purified water and solution preparation for 5%; packaging materials for 10%; microbiological validation and quality testing for 9%; regulatory registration and validation

documentation for 8%; production labor and energy consumption for 6%; and warehousing, logistics, and miscellaneous costs for 12%. The list of demand drivers includes the need for high-level endoscope disinfection, rapid turnaround disinfection, compatibility with automated endoscope washer-disinfectors, low-corrosion disinfection, low-residue disinfection, concentration monitoring support, hospital infection control, and the standardized development of grassroots-level endoscopy centers. The list of downstream customers encompasses tertiary hospitals, secondary hospitals, digestive endoscopy centers, respiratory endoscopy centers, ENT clinics, urological endoscopy units, health examination institutions, specialized clinics, sterile processing centers, and medical device reprocessing service providers. In terms of business opportunities, policy-driven factors stem primarily from heightened requirements for hospital infection control, the standardization of endoscope cleaning and disinfection protocols, strengthened medical quality assessment, capacity building for endoscopic diagnosis and treatment at the primary care level, and increasingly stringent regulatory oversight of disinfection products. Technological innovation is driven mainly by advancements in single-component stabilized formulations, low-corrosion and corrosion-inhibiting systems, rapid sterilization processes, compatibility with automated dosing systems, real-time concentration monitoring, low-odor formulations, and traceable packaging labels. Changes in consumer demand?manifested in hospitals placing greater emphasis on operational simplicity, disinfection speed, personnel safety, endoscope protection, residue control, cost-effectiveness, and supply stability?are driving the development of single-component peracetic acid disinfectants for endoscopes toward solutions that are ready-to-use, low-corrosion, low-irritation, machine-compatible, and backed by robust regulatory documentation.

This report studies the global Single-Component Peroxyacetic Acid Disinfectant for Endoscopes production, demand, key manufacturers, and key regions.

This report is a detailed and comprehensive analysis of the world market for Single-Component Peroxyacetic Acid Disinfectant for Endoscopes and provides market size (US\$ million) and Year-over-Year (YoY) Growth, considering 2025 as the base year. This report explores demand trends and competition, as well as details the characteristics of Single-Component Peroxyacetic Acid Disinfectant for Endoscopes that contribute to its increasing demand across many markets.

Highlights and key features of the study

Global Single-Component Peroxyacetic Acid Disinfectant for Endoscopes total production and demand, 2021-2032, (K Liter)

Global Single-Component Peroxyacetic Acid Disinfectant for Endoscopes total

production value, 2021-2032, (USD Million)

Global Single-Component Peroxyacetic Acid Disinfectant for Endoscopes production by region & country, production, value, CAGR, 2021-2032, (USD Million) & (K Liter), (based on production site)

Global Single-Component Peroxyacetic Acid Disinfectant for Endoscopes consumption by region & country, CAGR, 2021-2032 & (K Liter)

U.S. VS China: Single-Component Peroxyacetic Acid Disinfectant for Endoscopes domestic production, consumption, key domestic manufacturers and share

Global Single-Component Peroxyacetic Acid Disinfectant for Endoscopes production by manufacturer, production, price, value and market share 2021-2026, (USD Million) & (K Liter)

Global Single-Component Peroxyacetic Acid Disinfectant for Endoscopes production by Peracetic Acid Content, production, value, CAGR, 2021-2032, (USD Million) & (K Liter)

Global Single-Component Peroxyacetic Acid Disinfectant for Endoscopes production by Application, production, value, CAGR, 2021-2032, (USD Million) & (K Liter)

This report profiles key players in the global Single-Component Peroxyacetic Acid Disinfectant for Endoscopes market based on the following parameters - company overview, production, value, price, gross margin, product portfolio, geographical presence, and key developments. Key companies covered as a part of this study include Fujifilm (JP), Steris Life Sciences (US), Olympus (JP), Ecolab (US), AMTEC (GB), Wassenburg Medical (NL), WEGO (CN), SHINVA (CN), Lionser (CN), Guangzhou AULLAP (CN), etc.

This report also provides key insights about market drivers, restraints, opportunities, new product launches or approvals.

Stakeholders would have ease in decision-making through various strategy matrices used in analyzing the World Single-Component Peroxyacetic Acid Disinfectant for Endoscopes market

Detailed Segmentation:

Each section contains quantitative market data including market by value (US\$ Millions), volume (production, consumption) & (K Liter) and average price (US\$/L) by manufacturer, by Peracetic Acid Content, and by Application. Data is given for the years 2021-2032 by year with 2025 as the base year, 2026 as the estimate year, and 2027-2032 as the forecast year.

Key Questions Answered:

1. How big is the global Single-Component Peroxyacetic Acid Disinfectant for Endoscopes market?
2. What is the demand of the global Single-Component Peroxyacetic Acid Disinfectant for Endoscopes market?
3. What is the year over year growth of the global Single-Component Peroxyacetic Acid Disinfectant for Endoscopes market?
4. What is the production and production value of the global Single-Component Peroxyacetic Acid Disinfectant for Endoscopes market?
5. Who are the key producers in the global Single-Component Peroxyacetic Acid Disinfectant for Endoscopes market?
6. What are the growth factors driving the market demand?
