Single-component silane-modified sealant is a sealant based on silane-modified polymer (SMP) with a single-component design, ready for direct use without mixing. It cures through cross-linking reactions triggered by exposure to moisture in the air, forming a sealant layer with elasticity and adhesion properties. This type of sealant offers excellent weather resistance, eco-friendliness, low volatility, and strong adhesion, making it widely applicable for bonding and sealing in construction, automotive, and industrial sectors.
