## Abstracts

The global Single-Crystal Fiber market size is expected to reach \$ 62.53 million by 2032, rising at a market growth of 8.4% CAGR during the forecast period (2026-2032).

In 2025, global sales volume of Single-Crystal Fiber is estimated at approximately 30,000 meters, with a global average market price of around USD 1,150 per meter. The gross margin of major producers is generally in the range of 35%–55%.

Single-Crystal Fiber is a type of specialty optical material made from single-crystal materials such as sapphire, YAG and sesquioxides, and manufactured through crystal growth, directional forming and precision processing into slender fiber-like or waveguide-like structures. Unlike conventional silica optical fiber and photonic crystal fiber, its core feature is that the material itself has a continuous single-crystal structure. It offers high-temperature resistance, corrosion resistance, radiation resistance, high thermal conductivity, high laser damage threshold and excellent optical stability, making it suitable for high-end applications such as optical transmission in extreme environments, optical sensing and laser gain media.

The upstream of the Single-Crystal Fiber value chain mainly includes high-purity aluminum oxide, yttrium oxide, lutetium oxide, scandium oxide, rare-earth dopant sources, crucibles, protective gases, crystal growth equipment, fiber drawing equipment, cutting and polishing equipment, and coating materials. The midstream covers crystal growth, diameter control, doping control, orientation control, end-face processing, packaging and performance testing of Single-Crystal Fiber. The downstream mainly serves optoelectronic equipment, medical, aerospace, defense industry, petrochemical, and other research and high-end instrumentation fields. The value of the industry is mainly concentrated in high-quality single-crystal growth, low-

defect control, stable long-length drawing, low-loss transmission and application-specific customized processing capabilities.

This report studies the global Single-Crystal Fiber production, demand, key manufacturers, and key regions.
