Abstracts

The global Single Crystal Germanium market size is expected to reach \$ 225 million by 2032, rising at a market growth of 3.9% CAGR during the forecast period (2026-2032).

Single Crystal Germanium is a germanium material in which the crystal lattice of the entire sample is continuous and unbroken to the edges of the sample, with no grain boundaries. The absence of the defects associated with grain boundaries can give monocrystals unique properties, particularly mechanical, optical and electrical, which can also be anisotropic, depending on the type of crystallographic structure.

China is the largest Single Crystal Germanium market with about 56% market share. Europe is follower, accounting for about 29% market share.

The key players are China Germanium, Yunnan Germanium, Umicore, Chihong Zn&Ge, AXT, PS(Jenoptik), PPM, Baoding Sanjing etc. Top 3 companies occupied about 48% market share.

This report studies the global Single Crystal Germanium production, demand, key manufacturers, and key regions.
