The global Single-cylinder Motorcycle market size is expected to reach \$ 52500 million by 2029, rising at a market growth of 3.3% CAGR during the forecast period (2023-2029).

A single-cylinder motorcycle is a type of motorcycle that has an engine with only one cylinder. These motorcycles are typically lightweight, agile, and easy to handle, making them popular choices for entry-level riders and those who prioritize efficiency and simplicity over high-performance. Single-cylinder motorcycles are also commonly used in off-road riding, as their lightweight design and torquey power delivery make them well-suited for navigating rough terrain. They can come in various engine sizes, from small-displacement beginner bikes to larger adventure bikes and dual-sport motorcycles. Single-cylinder motorcycles are often chosen for their fuel efficiency, low cost of ownership, and ease of maintenance.

This report studies the global Single-cylinder Motorcycle production, demand, key manufacturers, and key regions.
