According to our (Global Info Research) latest study, the global Single Dose Laundry Detergent market size was valued at USD 4828.9 million in 2023 and is forecast to a readjusted size of USD 9038.7 million by 2030 with a CAGR of 9.4% during review period.

Single Dose Laundry Detergent are water-soluble pouches containing highly concentrated laundry detergent. The chemistry of laundry detergent capsules is the same as in liquid detergents (including alkylbenzenesulfonates). The dissolvable packets are typically made of polyvinylalcohol (PVA) or a derivative of PVA. Although the formulas are similar, a detergent pack's liquids may contain 10% water compared to 50% in liquid detergents.

Key driver in the laundry capsules market is the growing demand for convenience and ease of use, as consumers seek time-saving solutions for their laundry chores. Additionally, the rising awareness of hygiene and cleanliness, especially in light of global health concerns, drives the demand for effective laundry practices provided by laundry capsules. However, challenges such as the need for consumer education regarding proper usage and safety, price sensitivity among certain consumer segments, environmental concerns related to packaging waste and disposal, and the need for regulatory compliance pose obstacles to the industry. Overcoming these challenges while capitalizing on the market drivers is crucial for manufacturers to succeed in the laundry capsules market.
