Single leg chain sling is a kind of lifting equipment composed of lifting chain, hook, ring and other accessories. It has a wider range of applications than ordinary lifting chain. Avoid knotting or twisting when using it, and do not load the tip of the hook. Its normal operating temperature range is -40? to +200?, and it needs to be customized in special environments. When lifting, the lifting point of the sling should be located directly above the center of gravity of the lifting object to ensure safe and efficient operation.
