The global Single Phase Cast Resin Transformer market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Cast resin transformer refers to a transformer in which the primary winding and secondary winding are fully encapsulated with epoxy resin. Cast resin transformer is beneficial to prevent moisture from penetrating into the winding. The cast resin offers great protection against harsh environmental conditions. These transformers can operate without interruption at 100% humidity. Casting resin transformers inherit the advantages of oil-immersed and air-insulated transformers, and improve their shortcomings, making it develop rapidly in the last ten years.
