Abstracts

The global Single-Shaft Ribbon Blender market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Single-shaft ribbon blender is a type of mixer that consists of a horizontal, U-shaped vessel with a rotating shaft fitted with metal spokes and inner and outer helical blades called ribbons. The ribbons move the materials in opposite directions along the vessel, creating a balanced lateral and radial movement and a homogeneous mixture. A single-shaft ribbon blender can be used for mixing dry solids, wet suspensions, liquids, pastes and doughs. It can also be customized to meet various industry standards and requirements, such as sanitary, pharmaceutical, vacuum, or jacketed versions.
