According to our (Global Info Research) latest study, the global Single Side PTFE Fabric market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.

Single side PTFE fabric is a type of fabric that is coated with a layer of PTFE (polytetrafluoroethylene) on one side. PTFE is a synthetic fluoropolymer that is known for its nonstick and heat-resistant properties. The fabric is typically made from a woven fiberglass base, which provides strength and durability. Single side PTFE fabric is commonly used in various industries, including food processing, packaging, and industrial applications. The PTFE coating on one side of the fabric provides a nonstick surface, making it ideal for applications where low friction and easy release are required.
