Abstracts

The global Single-Stage Screw Air Compressor market size is expected to reach \$ 1914 million by 2032, rising at a market growth of 4.3% CAGR during the forecast period (2026-2032).

In 2025, the global production of single-stage screw air compressors reached 193,200 units, with an average selling price of US\$7,200 per unit. The global annual production capacity of single-stage screw air compressors is approximately 250,000 units, with a gross profit margin of approximately 23.7%. A single-stage screw air compressor is a commonly used air compression device, belonging to the screw air compressor type. It uses a single-stage compression method to increase air pressure to the required level and is widely used in industries such as manufacturing, automotive repair, and electronics. The upstream of the single-stage screw air compressor industry chain includes aluminum alloys/steel, seals, bearings, and motors; the midstream consists of single-stage screw air compressor manufacturers; and the downstream mainly includes industries such as textiles, food, and wastewater treatment.

The single-stage screw air compressor market is currently experiencing steady growth, driven by manufacturing upgrades, increased energy efficiency requirements, and expanding demand for compressed air. Compared to multi-stage screw compressors, single-stage models are competitive in terms of cost, simple structure, and ease of maintenance, and are widely used in small and medium-sized factories, food packaging, automotive, and packaging logistics. The industry is focusing on high-efficiency energy saving, low-noise design, compactness, and intelligent control (such as frequency conversion, online monitoring, and remote diagnostics) to improve overall lifecycle cost-effectiveness. At the same time, there is increasing attention paid to after-sales service networks, the stability of spare parts supply, and environmental compliance, leading to a

more concentrated market competition landscape.

This report studies the global Single-Stage Screw Air Compressor production, demand, key manufacturers, and key regions.
