## Abstracts

The global Single-Use Stirred Tank Bioreactors market size is expected to reach \$ million by 2029, rising at a market growth of % CAGR during the forecast period (2023-2029).

Single-Use Stirred Tank Bioreactors, as suspension cell bioreactors, can be used for mammalian suspension cell CHO, HEK293 cells, insect cell Sf9 culture, and microcarrier suspension culture, such as Vero cells, which are widely used in vaccine production and monoclonal antibody process development wait. Compared with traditional non-disposable bioreactors, disposable stirred tank bioreactors have better sterility performance and less cleaning work, so they are widely used in some specific biopharmaceutical production.
