## Abstracts

The global Sinus Dilation Devices market size is expected to reach \$ 2246 million by 2032, rising at a market growth of 14.2% CAGR during the forecast period (2026-2032).

Chronic sinusitis affects more than 31 million people in the United States. It is more prevalent than heart disease and asthma and has a greater impact on patients' quality of life than chronic back pain or congestive heart failure. The majority of patients with chronic sinusitis are treated with oral antibiotics and/or nasal steroids, which can increase the risk of antibiotic resistance and cause unwanted side effects such as epistaxis (nose bleeds), nasal ulcers, and nasal and oral infections. The most effective treatments are Functional Endoscopic Sinus Surgery (FESS) and balloon dilation at high pressures, which are known to cause significant patient discomfort and are conducted in a surgical suite under general anesthesia or IV sedation.

Global Sinus Dilation Devices main players are Kraton, Eni, Kuraray, TSRC, Sinopec, etc. North America is the largest market, with a share nearly 75%.

This report studies the global Sinus Dilation Devices production, demand, key manufacturers, and key regions.
