A sippy cup is a training cup –with a screw- or snap-on lid and a spout that lets your child drink without spilling. You can get models with or without handles and choose ones with different types of spouts.

Sippy cups can be a great way for your baby to transition from nursing or bottle-feeding to a regular cup. They can also improve hand-to-mouth coordination. When your baby has the motor skills to handle a cup but not the skills to keep the drink from spilling, a sippy cup can give him some independence while keeping cleanup to a minimum.
