According to our (Global Info Research) latest study, the global Skateboard Bearing market size was valued at USD 1753.8 million in 2023 and is forecast to a readjusted size of USD 2796.2 million by 2030 with a CAGR of 6.9% during review period.

Skateboard bearings are the round metal pieces that fit inside the wheels to mount the wheels to the axle.

Consumer goods are products which are intended for everyday private consumption. They cover a large product portfolio including food and non-food categories. They can be further classified into fast moving consumer goods (FMCG) and slow moving consumer goods (SMCG). The definitions are based on how frequently products are sold to the customer, a determining factor in the rotation of goods. FMCG products have a useful life shorter than a year and are, therefore, products bought relatively frequently with recurring expenditure. This includes categories such as food and beverages, personal care, cleaning products, apparel and footwear, tobacco and pet food/pet care. SMCG products have a useful life longer than a year, comprising items such as household appliances, furniture and home improvement products. These items have a lower sales frequency and are not rotating as rapidly as FMCG.
