According to our (Global Info Research) latest study, the global Skin Regeneration Stem Cell Therapy market size was valued at US\$ million in 2025 and is forecast to a readjusted size of US\$ million by 2032 with a CAGR of %during review period.

Stem cells have been an important discovery in recent years. Aesthetic medicine uses stem cells for rejuvenation therapies, wrinkle-?lling procedures (the so-called lipofilling) and for the treatment of alopecia (baldness). Stem cells are also successfully utilised in many other branches of medicine – in the treatment of joint diseases, spinal cord injuries and neurological conditions. Rejuvenation and lifting procedures using stem cells are amongst the most advanced and effective methods of reversing the ageing process. Stem cells smooth out wrinkles and lift sagging cheeks. The stem cell therapy makes discolorations and dilated pores disappear. These ‘wonder’ cells make patients look much more radiant and even several years younger.
