## Abstracts

A skydiver oxygen system is a piece of equipment designed to provide oxygen to skydivers. During high-altitude skydiving activities, due to the reduction in air pressure, the oxygen content in the air is reduced, which may cause hypoxia symptoms for skydivers. In order to ensure that skydivers can maintain an adequate supply of oxygen during skydiving, the skydiver oxygen supply system is designed as a lightweight and reliable device that can provide sufficient oxygen during skydiving. This system usually consists of oxygen bottles, oxygen regulators, oxygen pipes and masks, etc., which can ensure that skydivers maintain a good oxygen supply at high altitudes and ensure their safe skydiving.

According to our (Global Info Research) latest study, the global Skydiver Oxygen Supply System market size was valued at US\$ million in 2023 and is forecast to a readjusted size of USD million by 2030 with a CAGR of %during review period.
