Skydiving also called parachuting is an adventure sport that involves jumping from an airplane and performing certain acrobatic maneuvers in freefall. Container or harness systems, canopies, jumpsuits and helmets, and other accessories are the four different types of skydiving equipment required in the sport.

SCOPE OF THE REPORT:

This report focuses on the Skydiving Equipments in global market, especially in North America, Europe and Asia-Pacific, South America, Middle East and Africa. This report categorizes the market based on manufacturers, regions, type and application.

During 2017, the container or harness systems segment accounted for the major shares and dominated this market. Factors such as the technological innovations introduced in these instruments will contribute to the growth of this market segment in the coming years.
