According to our (Global Info Research) latest study, the global SLAM Robots market size was valued at US\$ 504 million in 2025 and is forecast to a readjusted size of US\$ 1203 million by 2032 with a CAGR of 13.4% during review period.

This report studies the SLAM Robots market, Simultaneous localization and mapping, or SLAM for short, is the process of creating a map using a robot or unmanned vehicle that navigates that environment while using the map it generates. SLAM is technique behind robot mapping or robotic cartography. The robot or vehicle plots a course in an area, but at the same time, it also has to figure out where its own self is located in the place. The process of SLAM uses a complex array of computations, algorithms and sensory inputs to navigate around a previously unknown environment or to revise a map of a previously known environment. SLAM enables the remote creation of GIS data in situations where the environment is too dangerous or small for humans to map.

The key players are Swisslog (KUKA), Omron Adept, Clearpath Robotics, Vecna, Mobile Industrial Robots, SMP Robotics, Aethon, Locus Robotics, Fetch Robotics, Hi-Tech Robotic Systemz, Amazon Robotics and so on.
