## Abstracts

According to our (Global Info Research) latest study, the global Sliding Circular Saw market size was valued at US\$ million in 2024 and is forecast to a readjusted size of USD million by 2031 with a CAGR of %during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

A Sliding Circular Saw, also known as a sliding table saw, is a specialized type of circular saw designed for making precise cuts in wood and other sheet materials. Unlike a standard benchtop circular saw, a sliding circular saw has a saw mounted on a carriage that slides along a track system. This allows the saw blade to be moved back and forth across the material, enabling wider rip cuts than the blade diameter itself.
