Abstracts

The global Sliding Injection Molding Machine market size is expected to reach \$ 2398 million by 2032, rising at a market growth of 7.5% CAGR during the forecast period (2026-2032).

Sliding injection molding machines are specialized plastic injection systems equipped with movable slide tables or multi-slide mechanisms, enabling complex part geometries, multi-step molding, insert molding, and high-precision component production within a single molding cycle. In 2025, the average global unit price is approximately US\$145,000, with global sales volume and production both estimated at around 9,800 units. The industry typically maintains a gross margin range of 25%-40%, supported by precision mechanical structures, customized tooling interfaces, automation compatibility, and strong demand from electronics, automotive, and medical component manufacturing. The supply chain includes upstream components such as servo motors, hydraulic systems, controllers, precision guide rails, and steel structures; midstream manufacturers focus on machine design, assembly, control software integration, and testing; downstream users include electronics manufacturers, automotive parts suppliers, medical device producers, and precision industrial component manufacturers. In 2025, the sliding injection molding machine market benefits from increasing demand for compact, high-precision plastic components with complex geometries. Growth is driven by miniaturization trends in electronics, lightweight automotive parts, and medical devices requiring integrated features and tight tolerances. Compared with conventional injection molding machines, sliding systems offer higher tooling flexibility and reduced secondary operations, improving overall production efficiency. Although equipment costs are higher, manufacturers are increasingly willing to invest due to improved yield, automation readiness, and long-term cost savings.

This report studies the global Sliding Injection Molding Machine production, demand, key manufacturers, and key regions.
