## **Abstracts**

According to our (Global Info Research) latest study, the global Small AC Gear Motor market size was valued at US\$ 556 million in 2025 and is forecast to a readjusted size of US\$ 851 million by 2032 with a CAGR of 6.2% during review period.

In 2025, global sales of small AC geared motors reached 12 million units, with an average selling price of US\$45 per unit. Small AC geared motors are small electric motors driven by AC power, incorporating gear reduction devices to provide higher torque output and lower speeds. They are widely used in home appliances, automation equipment, office equipment, tools, toys, and small machinery. These motors, with their stable performance, compact structure, and high efficiency, provide reliable power support in space-constrained environments.

Upstream raw materials mainly include copper wire, steel, aluminum alloys, rare earth permanent magnet materials, and motor control chips. Downstream demand primarily comes from home appliance manufacturers, automation equipment manufacturers, and various consumer goods manufacturers. In the future, with the popularization of smart homes and IoT technologies, and the increasing demand for small devices, small AC geared motors will develop towards higher efficiency, lower energy consumption, and greater intelligence. The industry's total production capacity is approximately 15 million units per year, with a gross profit margin of approximately 22%. In terms of downstream consumption, home appliances and automation equipment account for the largest share, followed by small machinery and toys; in terms of upstream material consumption, copper wire and steel account for a relatively high proportion.

On the demand side, with the continuous development of the home appliance industry,

the widespread application of automated manufacturing, and the rapid growth of the smart device market, the market prospects for small AC gear motors are broad, especially in the consumption upgrade of emerging markets, which brings continuous growth opportunities to the industry.
