Small Electric VTOL Drone refers to an electric-powered vertical take-off and landing unmanned aerial vehicle that combines the vertical mobility of a helicopter with the cruising efficiency of a fixed-wing aircraft. It enables takeoff and landing in confined spaces while offering longer range and better flight endurance. These drones are increasingly used in urban air mobility (UAM), logistics delivery, emergency rescue, and aerial surveying. With continuous advancements in battery technology, lightweight composite materials, and autonomous flight control, electric VTOL drones are rapidly progressing toward commercialization and are expected to play a major role in the low-altitude economy, smart logistics, and autonomous air transport sectors.
