The small satellite launch service market refers to the industry involved in launching small satellites into space. It has experienced significant growth in recent years due to the increasing demand for small satellite deployments for various applications, including Earth observation, communication, scientific research, and technology demonstration. The market is highly dynamic and evolving, with several companies competing to provide cost-effective and reliable launch services for small satellites.

A small satellite launch service is a provider that offers the capability to launch small satellites into space. These services typically cater to satellites with lower mass and volume requirements, often referred to as smallsats or cubesats. They offer an alternative to traditional large-scale launch providers by focusing on dedicated rideshare missions or dedicated launches specifically designed for small satellites. Small satellite launch services aim to provide cost-effective and timely access to space for smallsat operators, enabling a wide range of applications such as Earth observation, communication, scientific research, and technology demonstration.
