In 2025, global production of small tire changers reached 79,000 units, with an average selling price of US\$1,540 per unit. Small tire changers are compact tire changing and mounting devices designed for passenger car and light commercial vehicle tire maintenance scenarios. Their core tasks include completing tire bead pressing, rim clamping and positioning, skid-mounted or leverless tire mounting, and associated inflation and sealing processes within a limited workspace. They emphasize small footprint, flexible mobility and installation, rim surface friendliness, and single-person operation. Applications include independent auto repair and tire shops, 4S dealership quick repair bays, fleet and rental vehicle maintenance, mobile tire change services, racing and modification shops, etc. The upstream of the industry chain mainly consists of steel structures and castings, pneumatic and hydraulic components, motors and reduction mechanisms, control valves and electrical components, grippers and tire head wear parts, protective sleeves and lubricating consumables; the midstream involves equipment manufacturers completing structural design and process assembly, precision and safety verification, and forming standard and customized models; the downstream enters repair shops and chain stores through distributors and workstation integrators. The gross profit margin is approximately in the range of 20%–40%.
