Small capacity washers range from 1.5–3.4 cubic feet and can hold anywhere from 1–2 baskets of laundry. These kinds of laundry loads typically fit nine or fewer bath towels per load.

Small appliances are characterized by their compact and lightweight design, and are often used for a variety of tasks such as cleaning, cooking, and personal grooming. Compared to their larger counterparts, they are more prone to wear and tear and have a shorter shelf life. Therefore, consumers may opt to replace them more frequently. Small home appliances are extensively used in houses. These devices greatly help save the time and effort required for activities. Small appliances are available in different categories, such as manual, semi-automatic, and automatic, and are sold in supermarkets, hypermarkets, electronic specialty stores, and other online platforms. The increasing industrialization in several developing countries like India, South Korea, Brazil, UAE, and others is resulting in amplifying the demand for household appliances. Increase in the number of working professionals, especially women, has led to an increase in household income and improvement in living standards. This has also

boosted women's need to lessen their household chores by using different home appliances, thereby driving the product demand.
