## Abstracts

According to our latest research, the global Smart Advertising Delivery Solution market size will reach USD 5589 million in 2031, growing at a CAGR of 10.3% over the analysis period.

The advertising information optimization service solution is a comprehensive service system that improves the relevance, attractiveness and conversion efficiency of advertising content through data analysis, user profiling, intelligent content generation and delivery strategy adjustment. The solution usually includes modules such as automatic material generation, A/B test optimization, personalized recommendation, real-time feedback mechanism and cross-platform collaborative delivery, helping companies to achieve precision marketing from 'one face for one thousand people' to 'one face for one thousand people'. With the development of artificial intelligence, big data and multimodal technology, advertising optimization is evolving towards a more intelligent, automated and closed-loop direction, especially in content understanding, emotion recognition and dynamic creative generation. It has shown a trend of rapid progress and has become a key engine for brand acquisition, retention and ROI improvement.
