Abstracts

According to our (Global Info Research) latest study, the global Smart Beacon market size was valued at USD 2102.9 million in 2023 and is forecast to a readjusted size of USD 13580 million by 2030 with a CAGR of 30.5% during review period.

A Smart Beacon is a small Bluetooth radio transmitter.

It’s kind of like a lighthouse: it repeatedly transmits a single signal that other devices can see. Instead of emitting visible light, though, it broadcasts a radio signal that is made up of a combination of letters and numbers transmitted on a regular interval of approximately 1/10th of a second. A Bluetooth-equipped device like a smartphone can “see” a beacon once it’s in range, much like sailors looking for a lighthouse to know where they are.

Europe held the largest share of the smart beacon market in 2017 owing to the high traction of the beacon technology and growing need for technologically advanced marketing platforms among the end users to capture the shares in the respective markets. In addition, Europe is an early adopter of the technology, and the customers in this region have accepted the technology seamlessly. APAC is expected to witness significant growth due to the growing traction of the beacon technology in China and Australia. Further, the market is still in a nascent stage in this region and has a lot of potential.

The Global Info Research report includes an overview of the development of the Smart Beacon industry chain, the market status of Retail (Bluetooth Low Energy (BLE), Hybrid), Public Gatherings & Spaces (Bluetooth Low Energy (BLE), Hybrid), and key enterprises in developed and developing market, and analysed the cutting-edge
