## Abstracts

PMOLED display panel is a kind of OLED display panel, with the characteristics of self-illumination, compared with the traditional small and medium-sized screen LCD panel, the panel thickness used is thinner, can be as thin as 0.2mm, the picture quality is higher, with high brightness, high contrast ratio and other characteristics. It is mainly used in the field of small and medium-sized displays. Compared with LCD, smart home PMOLED panel require no backlight, low power consumption, small size, low driving requirements, low impact on the control circuit, low requirements for circuit modification and smooth upgrading when necessary. The screen display has a more technological sense, in line with the fashionable and simple style characteristics of home applications.
