According to our (Global Info Research) latest study, the global Smart Hybrid Inverter market size was valued at US\$ 3697 million in 2024 and is forecast to a readjusted size of USD 9585 million by 2031 with a CAGR of 14.7% during review period.

A Hybrid Inverter is an intelligent inverter that enables the storage of excess solar energy in a battery system for self-use. Hybrid inverters function like a common grid-tie solar inverter but can generally operate in one of several different modes depending on the application, this includes battery backup mode which provides a limited level of backup power in the event of a blackout. Most hybrid inverters can also operate without a battery and function just like a grid-tie solar inverter by exporting excess solar energy to the utility grid.
