## **Abstracts**

The global Smart Meters Cylindrical Primary Lithium Batteries market size is expected to reach \$ 647 million by 2032, rising at a market growth of 5.5% CAGR during the forecast period (2026-2032).

Cylindrical primary lithium batteries for smart meters are non-rechargeable lithium primary cells designed for utility metering equipment including smart water meters, smart electricity meters and smart gas meters. Featuring low self-discharge, long service life, wide operating temperature range and good adaptability to low power consumption, they can provide maintenance-free power supply for meters for several years up to more than a decade. The price of cylindrical primary lithium batteries for smart meters varies by model, capacity, chemical system and purchase volume. The unit price of mainstream models ranges from 0.8 to 2.4 US dollars each. Lithium thionyl chloride batteries are priced at 1.4 to 2.4 US dollars each, while lithium manganese dioxide batteries cost 0.8 to 1.2 US dollars each. Bulk orders enjoy a discount of 10% to 20%. The industrial chain is well-developed. The upstream includes lithium ore, chemical materials, steel cases, separators and electrolytes. The midstream focuses on cell production and battery packaging. The downstream serves meter manufacturers, system integrators and utility operators, forming a complete industrial chain from raw material supply to end application.
