Abstracts

According to our (Global Info Research) latest study, the global Smart Pet Hardware market size was valued at US\$ 2943 million in 2025 and is forecast to a readjusted size of US\$ 5044 million by 2032 with a CAGR of 8.4% during review period.

Smart Pet Hardware refers to connected pet-care devices that integrate sensors, cameras, microphones, speakers, motors, wireless connectivity, app control, AI recognition or data analytics for pet feeding, hydration, cleaning, tracking, monitoring, companionship, training and health management. The core categories include smart pet feeders, smart pet collars and pet companion robots, while the broader scope also covers smart fountains, automatic litter boxes, pet cameras with treat dispensers, smart pet doors, interactive toys, pet dryers and pet health-monitoring devices. The smart pet hardware value chain consists of upstream sensors, camera modules, microphones, speakers, motors, pumps, batteries, plastic and metal components, MCUs, communication modules and AI algorithms, midstream smart pet device brands, ODM/OEM manufacturers and app/cloud platform providers, and downstream sales through e-commerce platforms, brand websites, pet retailers, supermarkets, veterinary channels and pet-service networks to pet-owning households.

The market is mainly driven by the humanization of pets, the growth of single-person and dual-income households, and rising demand for remote, precise and data-driven pet care. Pet owners increasingly want to feed, monitor, comfort and manage pets when they are at work, traveling or away from home. At the same time, falling costs of cameras, sensors, Wi-Fi/Bluetooth modules, low-power positioning, motors and cloud-app systems are enabling traditional feeders, fountains, litter boxes, collars and cameras to become connected devices. AI recognition, multimodal sensing and health analytics further enhance product differentiation, upgrading high-end products from

simple automation tools into pet health and companionship management terminals.
