Abstracts

The global Smart Range Hood market size is expected to reach \$ 5091 million by 2032, rising at a market growth of 7.7% CAGR during the forecast period (2026-2032).

In 2025, global Smart Range Hood production reached approximately 3.48 M units, with an average global market price of around US\$ 845.2 per unit.

Smart Range Hood is a kitchen exhaust system that integrates sensors, networking, and algorithm control capabilities on the basis of traditional range hoods. It can automatically adjust airflow and air pressure based on signals such as smoke, PM, temperature, humidity, and volatile organic compounds. It also supports mobile app, voice, and touch control linkage (such as with cooktops, gas valves, kitchen lighting, air purifiers/fresh air systems) to achieve functions such as automatic on/off, delayed exhaust, filter life reminders, fault self-diagnosis, and remote maintenance, thereby improving exhaust efficiency, ease of use, and safety.

The focus has shifted from simply 'connecting to the internet' to 'understanding the cooking process better,' emphasizing automatic cruise boost, powerful exhaust during stir-frying, delayed shut-off, and integration with cooktop heat, cookware temperature, and gas safety to reduce manual operation and improve user consistency. This is achieved through more efficient motors and optimized air ducts to reduce noise and improve energy efficiency; enhanced self-cleaning (high-temperature steam/hot melt oil/automatic flushing, etc.), no-disassembly cleaning, and filter consumable management, coupled with digital after-sales support (remote diagnostics, maintenance reminders).

Multiple solutions are available for different kitchen layouts (open-plan, island, small

apartments, low-rise poor ventilation, shared exhaust ducts), including side-suction, top-suction, lift-up, and integrated solutions, differentiated around features like 'backflow prevention, oil stain resistance, and odor prevention.' A unified app/ecosystem is established with refrigerators, dishwashers, and steam ovens, extending towards a more complete smart kitchen solution.
