According to our (Global Info Research) latest study, the global Smart Sleep Mattress market size was valued at US\$ 2175 million in 2025 and is forecast to a readjusted size of US\$ 4147 million by 2032 with a CAGR of 9.8% during review period.

A smart sleep mattress is a product that integrates sensing technology and an intelligent control system. It can monitor the user's sleep status and physiological parameters (such as heart rate, breathing, and body movement) in real time, and optimize the sleep environment and improve sleep quality by automatically adjusting the mattress firmness, temperature, or angle. It is widely used in home health management, elderly care, and smart home systems. In 2024, sales reached 2.05 million units, with an average price of \$1877 per unit. Single-line production capacity was 100,000 units, and the gross profit margin was 44%.

The supply chain of smart sleep mattresses can be roughly divided into two overlapping links: 'smart modules + traditional mattresses'. The upstream includes traditional mattress materials such as polyurethane foam, latex, and springs, as well as suppliers of core components such as pressure/heart rate/breathing sensors, posture recognition sensor arrays, MCU control chips, Wi-Fi/Bluetooth modules, motors or airbag actuators, flame-retardant fabrics, and zipper fabrics. The midstream consists of mattress brands and ODM/EMS manufacturers responsible for structural design, smart module integration, algorithm and app development, embedding sensors into the mattress layers, and completing the assembly, calibration, and certification (such as electrical safety, wireless communication, and environmentally friendly materials). The downstream involves sales and deployment through e-commerce platforms, offline home furnishing stores, sleep experience centers, smart home channels, and some

medical/health care institutions, along with cloud data services, sleep report subscriptions, and after-sales maintenance, thus forming a closed-loop supply chain system of 'hardware + software + services'.
