## Abstracts

According to our (Global Info Research) latest study, the global Smart Streetlight Pole Gateway market size was valued at US\$ 108 million in 2025 and is forecast to a readjusted size of US\$ 147 million by 2032 with a CAGR of 4.3% during review period.

In 2025, global sales of Smart Streetlight Pole Gateway reached approximately 0.5 million units, with an average market price of about USD 210 per unit, an annual production capacity of roughly 0.65 million units, and an industry-average gross margin of approximately 30%.

A Smart Streetlight Pole Gateway is the pole-side or edge-side communication and control hub deployed in a smart pole or smart street lighting system. It connects lighting controllers, cameras, environmental sensors, LED displays, public broadcast units, emergency call devices, chargers, and Wi-Fi/5G equipment into one network, while handling protocol conversion, edge computing, remote O&M, cloud connectivity, and multi-department platform linkage. In market statistics, it should be counted as industrial communication and edge-control hardware within the smart pole system, rather than the whole pole, luminaires, or upper-layer software platform.

Upstream, the product relies mainly on communication chips and modules (4G/5G, LoRaWAN, Wi-Fi), industrial CPUs/MCUs, memory, PCBs, power and PoE modules, antennas, interface components, waterproof enclosures, and embedded OS/firmware. The midstream consists of gateway OEMs, industrial networking vendors, and smart pole solution providers. Downstream, the main users are municipal lighting projects, smart-city EPC contractors, campus/park/scenic-area operators, traffic and public-security authorities, and urban O&M platforms. In the value chain, the gateway sits at

the core of 'multi-device access + edge processing + platform coordination': it sources electronic and communications components upstream and enables integrated applications downstream such as lighting management, video surveillance, environmental sensing, information release, public broadcast, emergency calling, and EV charging.
