Abstracts

The global Smart Wireless Video Doorbell Camera market size is expected to reach \$ 2820.5 million by 2029, rising at a market growth of 11.2% CAGR during the forecast period (2023-2029).

The major driving factor for the growth of the video doorbell market is the increase in safety and security concerns owing to the increase in the number of cases such as burglary and break-ins. Video doorbells offer high security and benefits such as remote locking and unlocking and alerting the owner. Furthermore, advancements in IoT technology, reduction in component costs, and integration of video doorbells with smart locks are expected to drive the growth of the video doorbell market. Rising awareness about security in residential and commercial buildings coupled with gradual increase in incidents of theft and robbery across the globe are the major factors likely to drive the demand for video doorbells. Moreover, they have become indispensable as the growing trend of home automation spurs their demand. Furthermore, rising demand for smart homes equipped with smart security systems is expected to drive market growth over the forecast period. However, lack of internet connectivity and high capital cost may hamper the growth of the video doorbell market. On the contrary, technological innovations in video doorbell systems are expected to provide lucrative opportunities for the growth of the video doorbell market.

Smart Wireless Video Doorbell Cameras work the same way as home security cameras, connecting to your home Wi-Fi and sending notifications to your smartphone when motion is detected. You can log in and view live feeds from your cameras, and even talk to anyone on your threshold. Alternatively, you can ignore the notification and view the video later. The higher the resolution of the doorbell camera, the more detailed the picture will be.
