Abstracts

The global Smartphone DDIC market size is expected to reach \$ 3857.3 million by 2029, rising at a market growth of 8.2% CAGR during the forecast period (2023-2029).

Globally, smartphone DDIC companies are mainly distributed in South Korea and Taiwan, and South Korean companies occupy a large market share, accounting for more than 65%. The market share of the top five companies in the world accounts for more than 88%. In the future, with the upgrading of 5G smartphones, the penetration of AMOLED DDIC will accelerate, and the proportion will increase significantly.

DDIC is the main part of the display imaging system. It is mainly responsible for the functions of driving the display and controlling the driving current. In the past two years, due to the impact of the market economy environment, the consumption of smartphones has declined, resulting in a decline in the demand for core components of mobile phones. The future trend of DDIC for smartphones will depend on the terminal consumer market.
