SMC/BMC mold is a tool used to manufacture plastic products with complex shapes. It is made of glass fiber reinforced thermosetting composite materials and is formed by mold pressing. It has the characteristics of high strength and corrosion resistance. It is widely used in automobiles, electronics, construction, aerospace and other fields.

SMC mold, that is, sheet molding mold, has high dimensional accuracy and shape stability, good reproducibility, relatively simple molding process, easy operation and control, smooth and flat surface, and short molding cycle. BMC molds are manufactured using advanced technology and precision equipment. They can quickly complete the filling, pressing and demoulding processes, are durable, and are suitable for the production of BMC products of different shapes and sizes.
