Smokeless Barbecue Grill Charcoal refers to a type of charcoal specifically designed for barbecue purposes that produces significantly less smoke during the grilling process compared to traditional charcoal. It is usually made through a special manufacturing process or with added substances that modify the combustion characteristics of the charcoal. This type of charcoal is engineered to provide a cleaner and more enjoyable barbecue experience by reducing the amount of soot, odor - producing compounds, and visible smoke emissions, which are often associated with the incomplete combustion of traditional charcoal. It still retains the ability to generate sufficient heat for cooking various types of food on a grill.
