## Abstracts

The market is experiencing modest growth due to declining demand from the automotive industry and current growth and increasing use of automotive adhesives. Given the strict environmental regulations of other adhesives on the market that prohibit the use of highly toxic solvents with volatile organic compound emissions, while SMP adhesives are odorless, contain no isocyanates and solvents, and do not emit VOCs, demand for them is expected to increase. The automotive and transportation industries continue to demand more advanced and improved adhesives. These adhesives must have excellent adhesion, excellent durability, chemical and high temperature resistance, and low shrinkage.

According to our (Global Info Research) latest study, the global SMP Automotive Adhesive market size was valued at USD million in 2022 and is forecast to a readjusted size of USD million by 2029 with a CAGR of % during review period.
