According to our (Global Info Research) latest study, the global SN-MT Patch Cords market size was valued at US\$ 24.3 million in 2024 and is forecast to a readjusted size of USD 45 million by 2031 with a CAGR of 8.9% during review period.

In this report, we will assess the current U.S. tariff framework alongside international policy adaptations, analyzing their effects on competitive market structures, regional economic dynamics, and supply chain resilience.

SN-MT patch cords are a new type of fiber optic patch cord that combines the SN connector interface with a multi-fiber MT ferrule structure. It integrates multiple fibers (typically 8, 12, or 16 fibers) into a compact package while using SN connectors to branch out multiple duplex links, achieving ultra-high density and flexible cabling. SN-MT patch cords are especially suited for internal or panel-to-panel high-density, high-bandwidth interconnect applications in 400G/800G optical modules such as QSFP-DD and OSFP, greatly reducing space requirements and improving installation efficiency.
