SN patch cords are fiber optic patch cables terminated with SN connectors. The SN connector, developed by Senko, is a new ultra-compact duplex connector designed specifically for high-speed data center applications. Compared to traditional LC connectors, SN connectors are smaller and offer higher density, with each SN connector supporting two fibers (one for transmit, one for receive). SN patchcords are commonly used in high-speed interconnects such as 400G and 800G applications, offering increased port density while maintaining low insertion loss and high return loss performance.
